

The Federal Communications Commission

Dear The Federal Communications Commission,

I would not enjoy paying more for my telephone line. In a way I can barely afford all the bills now nevermind one of them going up. I would very much like it so if the phone bills did not go up. Keep it fair they take out enough taxes already. I only use my cell phone for emergency and to talk when I am not at home. This is an outrage and very unacceptable. Personally if the bills go up a lot of people aren't going to want to pay it and will drop the lines. Think about what a mistake this would be.

Sincerely,

Jamie Schoff
